TRENCHING SHOVELS

DESCRIPTION

The Stanway Trade Trenching Shovel is designed for creating and clearing narrow trenches. Its narrow blade with square sides helps create clean, defined trench walls, while a foot tread provides additional downward pressure when removing loose material. The head is made from 100% tempered, heat-treated carbon steel for strength and durability.

FEATURES

- Ideal for creating and clearing narrow trenches.
- Foot tread provides extra downward pressure.
- 100% tempered, heat-treated carbon steel head.
- **Long Hickory Handle:** Strong, natural shock-absorbing timber handle providing added reach and leverage.
- **Long Fibreglass Handle:** Strong, fibreglass handle providing added reach and leverage with excellent resistance to moisture, splitting and weathering.
