

PRODUCT INFO

TOILET AUGER

TW-3RB

DESCRIPTION

The Stanway Trade Toilet Auger provides a practical solution for clearing toilet blockages through the trap, without the need for chemical cleaners. Its heavy-duty bulb head helps remove hair, cloth, debris and other soft blockages. It features a 1 metre long zinc-plated spring cable, providing flexibility and corrosion resistance for long-lasting use. The smooth-grip handles allow easy and controlled rotation, while the rubber sleeve guard helps protect the toilet bowl surface during use. A key ring securely holds the cable in place when not in use, while a second ring provides convenient hanging storage.
